1 Introduction

`Study Slug` is an app that will allow students and faculty to coordinate study groups in an intelligent, hassle-free manner.

2 High level goals

The goal of this release is to have an Android application that provides the following:

- A user can create a profile and list the courses they are enrolled in.

- A user may initiate a new study group for a course they are enrolled in, and the app will provide suggestions for study partners who are enrolled in the same course.

- A user may request to be notified when new study groups are formed for the courses they are enrolled in.

- A group leader can configure a recurring study group, including features such as scheduling, links to shared documentation, and locations.

- Prototype testing?

- Continuous integration?

- Website?

3 User stories for release

3.1 Sprint 1

These are supposed to be user stories somehow?

1. Set up Git workflow

2. Create release plan

3. Create initial project presentation

4. Create sprint 1 plan

5. Set up Android Studio

6. Configure Android Studio to work with Firebase project

7. Work through Android studio

3.2 Sprint 2

1. As a user, I want to be able to use the app on my Android phone.

2. As a user, I want to be able to create a profile tied to my CruzID.

3. As a group leader, I want to be able to initiate a study group.

4. As a student, I want to be notified when others initiate study groups.

3.3 Sprint 3

1. As a user, I want to be able to setup my profile with my enrolled courses.

2. As a user, I want to be able to put useful information in my profile.

3. As a group leader, I want to be able to coordinate recurring study groups.

4. As a group leader, I want to be able to create a profile for my study group.

5. As a user, I want to be able to select from a list of courses.

3.4 Sprint 4

1. As a leader, I want to have study partners suggested to me.

2. As a user, I want to be able to join an open study group.

3. As a leader, I want to be able to set my study group to a location.

4. As a student, I want to be notified when others form study groups near my location.

5. As a user, I want to be able to rate others based on my experience.

6. As a user, I want to be able to use the app from the web.

7. As a user, I want to have the study sessions integrate into my calendar.
